

Optimering af produktion via data – nye muligheder på vej

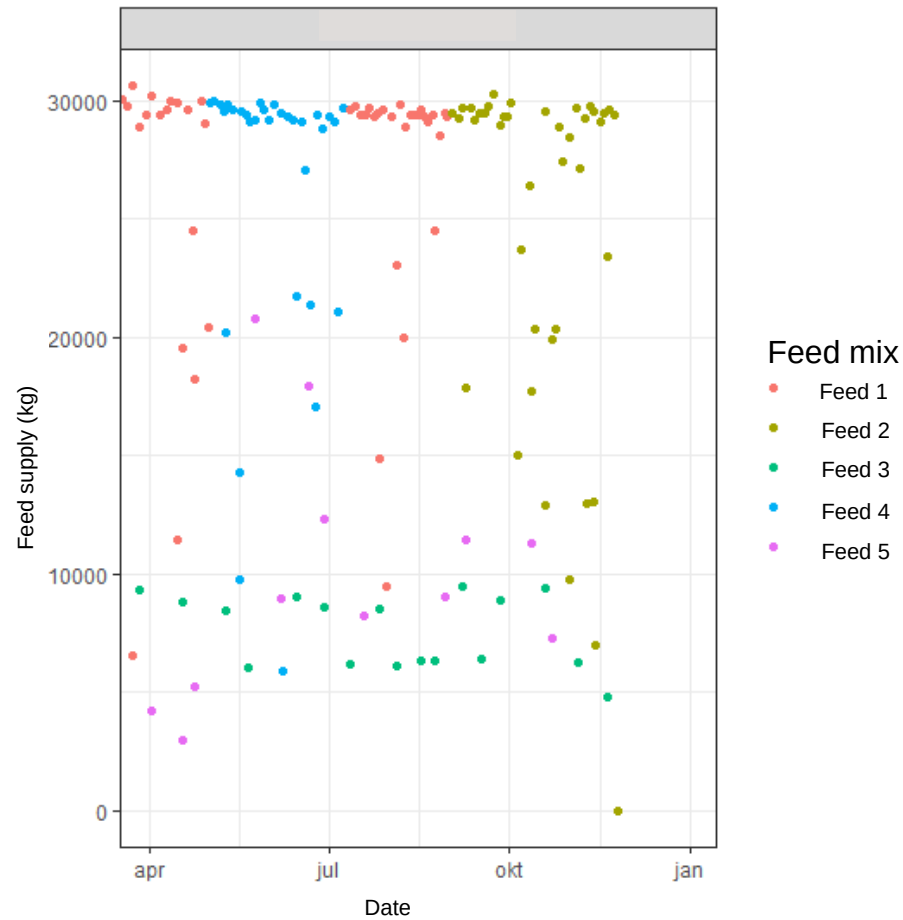

Thomas Nejsum Madsen
Michael Agerley

Eksempel – Kvartalsopgørelse af foderudnyttelse (Fe/kg tilv.): 20.000 slagtegrise / år

2.000 tons foder leveret i perioden

Eksempel: Foderleverancer (færdigfoder)

Cloudbaseret løsning med integrationer reducerer behovet for manuelle registreriner

- Carcass weight
- Meat percentage

- Daily gain - FCR
- Delivery prognoses 12 w

- Feed deliveries
- Feed mix content

- FCR - Daily Gain
- Feed consumption prognoses
- Delivery planning

- Pig entries
- Dead pigs
- Status counts

- Daily gain - FCR
- Delivery prognoses 12 w

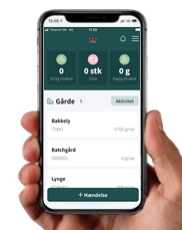

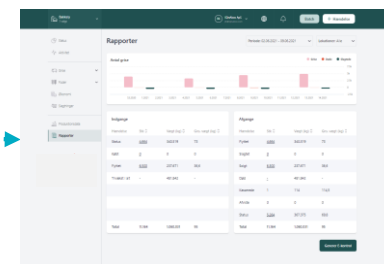

API integration

Other IT Solution

Eksempel – Kvartalsopgørelse af foderudnyttelse (Fe/kg tilv.): 20.000 slagtegrise / år

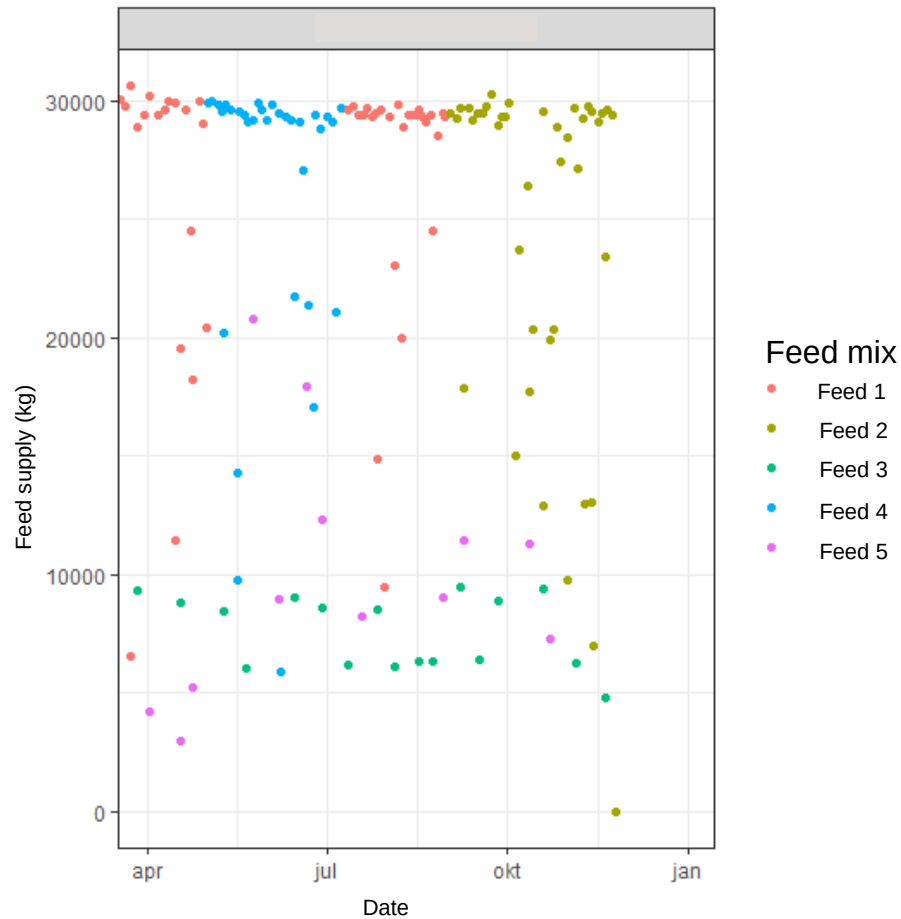

Eksempel - Foderudnyttelse (Fe/kg tilv.) dynamisk: 20.000 slagtegrise / år

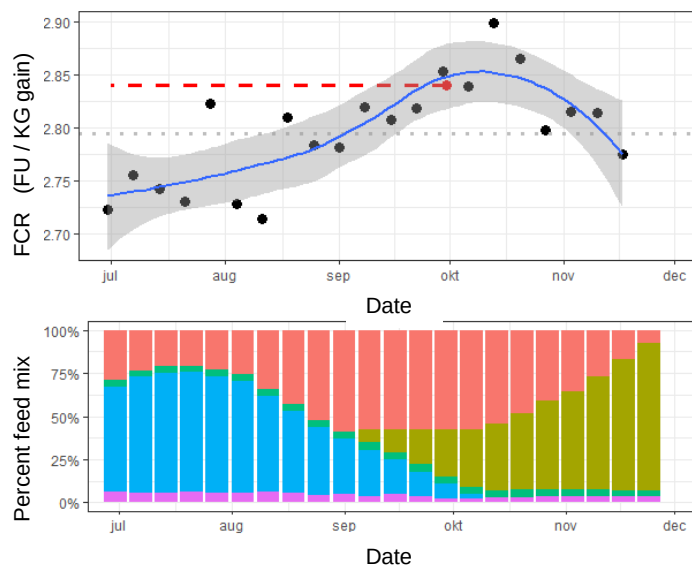

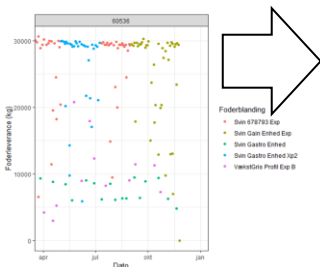

2.000 tons foder leveret i perioden

Eksempel: Foderleverancer (færdigfoder)

Relativ andel af foderblandinger forbrugt i perioden (opgjort)

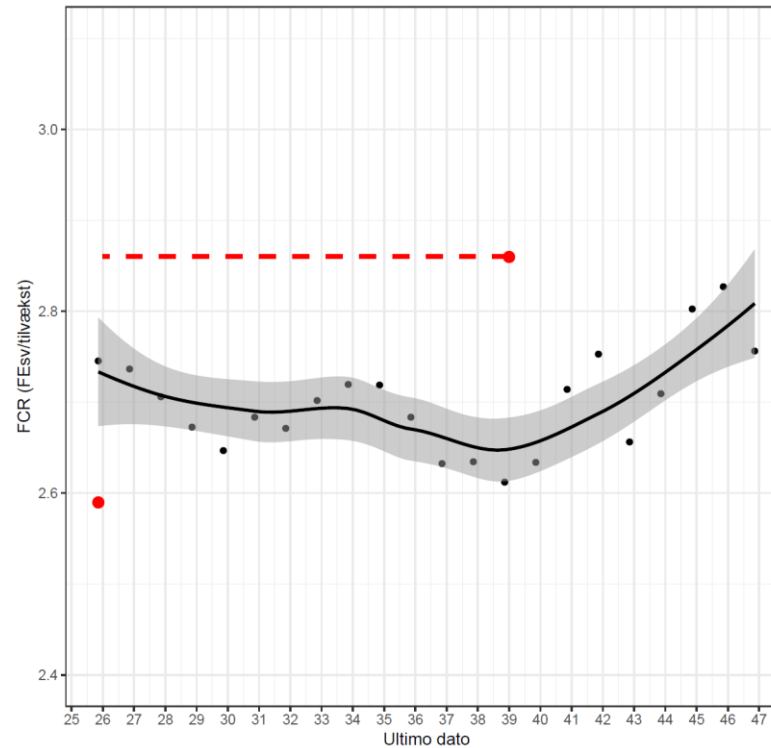

Feed mix

- Feed 1
- Feed 2
- Feed 3
- Feed 4
- Feed 5

0,1 FE/Kg tilvækst = 400.000 kr / år i eksemplet

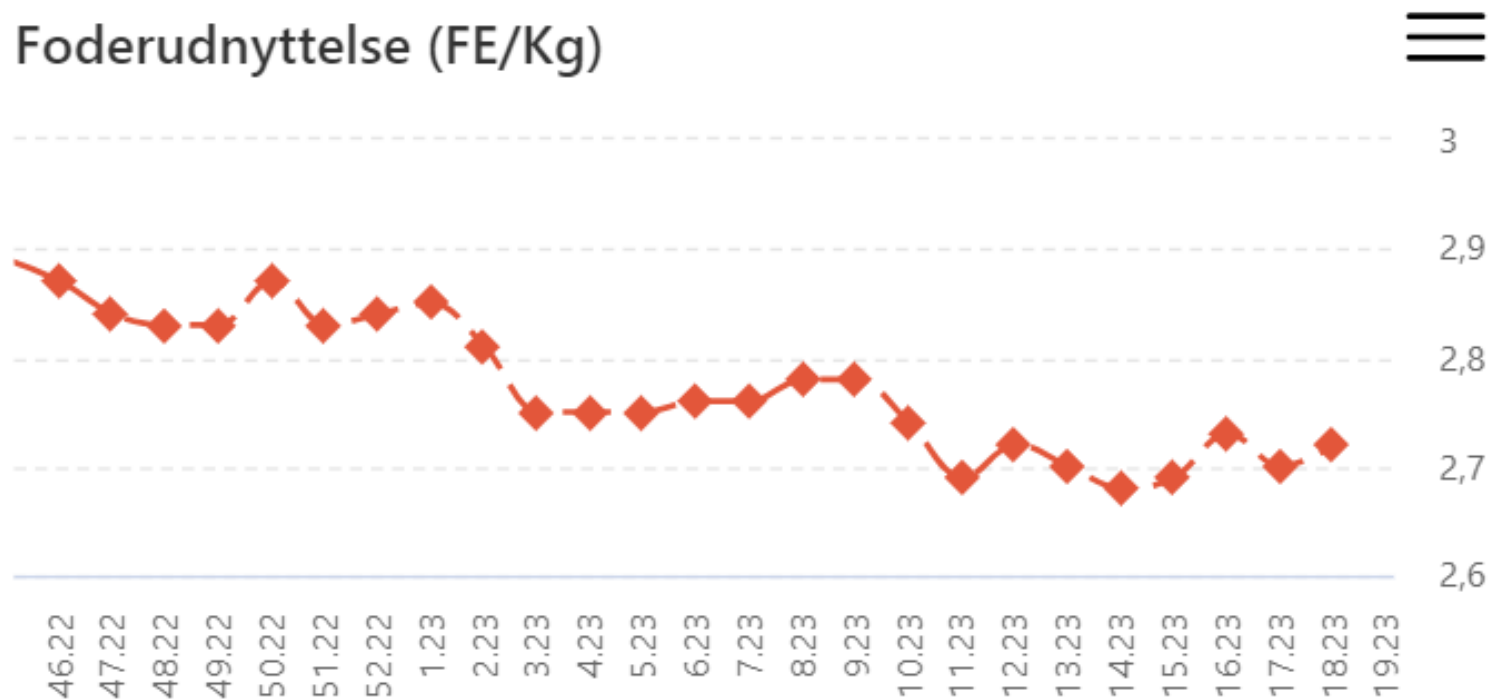

Eksempel: Kvartalsvis opgørelse vs. dynamiske estimer

Foderudnyttelse Fe/kg tilv.

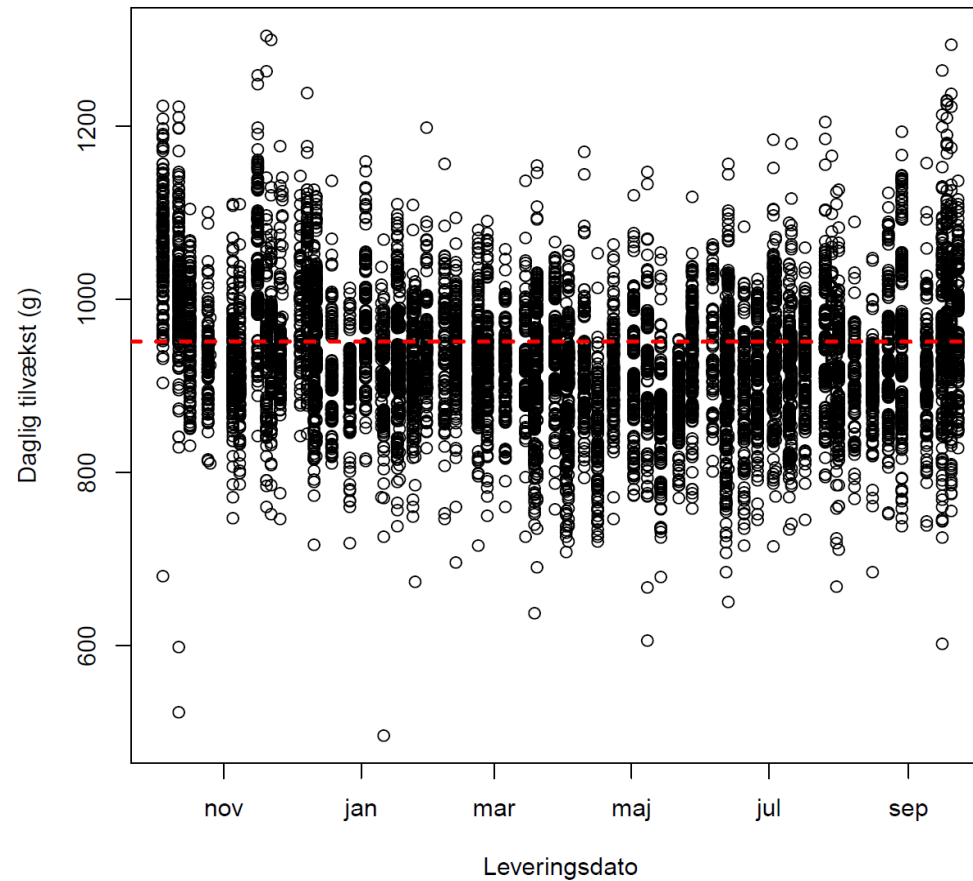

Eksempel: Effekt af ændret foderblanding - slagtegrise

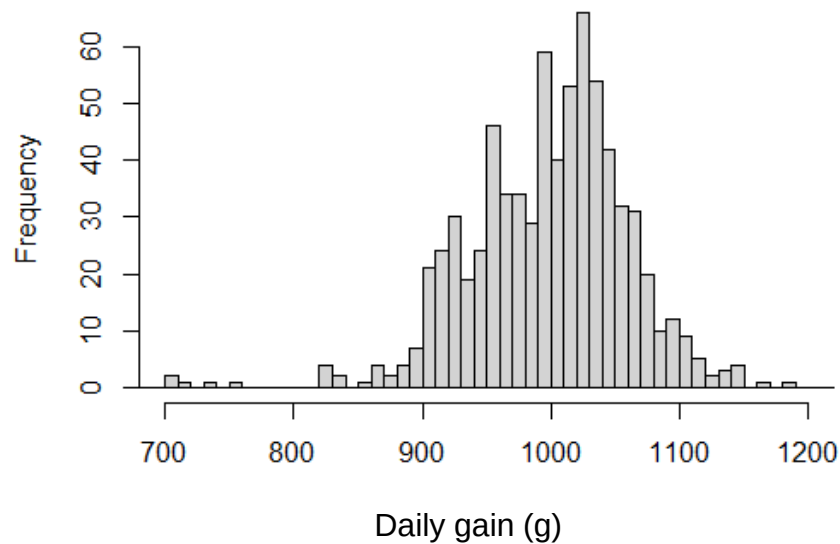

Foderudnyttelse (FE/Kg)

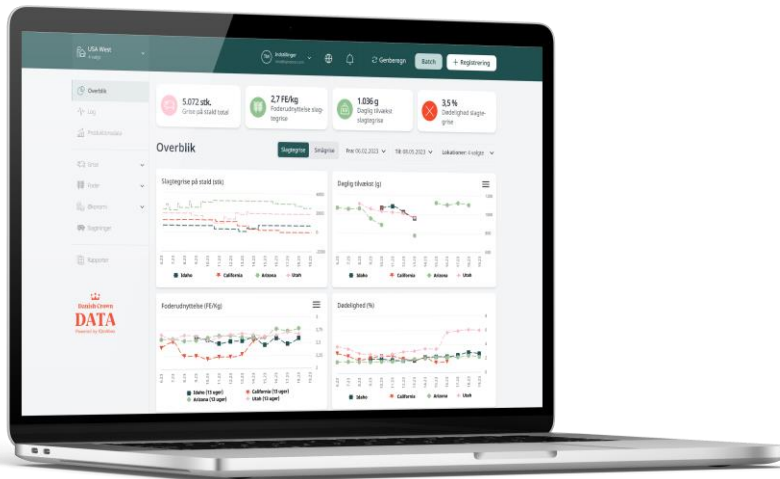

Eksempel: daglig tilvækst på baggrund af slagtevægt på enkelt dyr

Eksempel: Spredning i daglig tilvækst – 3 måneders data fra 1 gård
